DETAILED ACTION

Withdrawn Claim Objections/Rejections

1. Applicants' amendment received March 11, 2005 canceled claim 1 and rendered moot all of the prior claim objections and rejections.

New Grounds of Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2, 10 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3, 14 and 19 of U.S. Patent No. 6,686,809 (of record). Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 3 of the '809 patent includes the plurality of control signals with one being selected and claim 3 includes all features of claim 2 of the '809 patent which recites each of the other features of the integrated circuit of claim 2 of the instant application. Similarly, claim 14 of the '809 patent, which includes all features of claim 13 of the '809 patent, recites all features of the method of claim 10 of the instant application, and claim 19 of the '809 patent

Art Unit: 2817

similarly recites all features of the computer program of claim 18 of the instant application.

Allowable Subject Matter

4. Claims 3-9, 11-17 and 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's amendment filed March 11, 2005 did not present any arguments since claim 1 was canceled and all new claims were presented. Therefore, no response by the Examiner is necessary at this time.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2817

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Särkkä U.S. 5,420,552 discloses a method for tuning a bandpass filter that includes an adjustable phase shifter 25 (Fig. 2). However, the reference signal is based upon the power reflected from the filter.
